SUMMARY

Motivated front-end developer with foundational knowledge of JavaScript and experience in building responsive web applications using ReactJS, Tailwind CSS, and Bootstrap. Skilled in API integration and state management with Redux through projects like an e-commerce site and a weather app. Eager to grow and apply my skills to create seamless user experiences.

Currently expanding into backend technologies, I am committed to improving my expertise in JavaScript, React, and backend development, aiming to contribute to a collaborative team as a full-stack developer.

EXPERIENCE

Full Stack Web Developer (MERN) Internship

Grras Solution Pvt. Ltd.

04/2024 - Running Jaipur, Rajasthan

Here I developed and maintained comprehensive web applications using a range of technologies including HTML5, CSS3, JavaScript, React JS, Node JS, Express JS, and MongoDB. Implemented responsive design principles to ensure applications are mobile-friendly and provide a seamless user experience across devices.

EDUCATION

BCA Bachelor of Computer Application

Rajasthan University

2019 - 2022 Jaipur, Rajasthan

SKILLS

Frontend

Html	CSS3	JavaScript	React JS	Git	Redux
Bootstrap	MUI	Tailwind CSS	Canva	Basic Figma	Codepen

Backend

Node JS	Express JS	NextJS.
---------	------------	---------

Database

MongoDB

PROJECTS

To-do List

<https://bit.ly/3XEu7Qw>

To-Do List is a simple yet effective application built with ReactJS, featuring custom CSS and Tailwind CSS for a clean, responsive design. Users can easily add, edit, and delete tasks, with the ability to mark items as complete. The app efficiently manages local state to provide a seamless experience, making task organization straightforward and user-friendly.

e-Commerce (MERN)

<https://bit.ly/4gz1Ljc>

Shopkr is a web application built with ReactJS for the front end and Node.js with Express for the back end, using MongoDB for data storage. It features user authentication and CRUD operations, with a responsive design created using Tailwind CSS. The app efficiently manages data through RESTful APIs, providing a seamless user experience across devices.

Indian-Tourism

<https://bit.ly/3TEMnYM>

I developed a fully customized, mobile-friendly Indian tourism website using React.js and Redux. The site showcases over 30 cities with detailed information on attractions, culture, popular places, and food. I implemented lazy loading and custom CSS to optimize performance and create a responsive user interface, ensuring a seamless user experience across all devices.

E-Commerce

<https://bit.ly/4gAvpEC>

vishufy is a responsive e-commerce website built with ReactJS, HTML, CSS, and JavaScript, utilizing Tailwind CSS and Bootstrap. It features API integration for dynamic product display and uses Redux for centralized state management of the cart and wishlist, ensuring seamless real-time updates and user interactions.

CERTIFICATION

MERN Stack Web Development
